Acknowledgments

This book is the result of a great deal of hard work by many dedicated people. We thank all of the contributors for their outstanding effort in making this text a seminal work in the field.

We are also grateful to Marilyn Kupetz, TESOL’s former managing editor, who provided encouragement to proceed with both editions of this text; to Carol Edwards, who continues TESOL’s tradition of publishing excellence; and to Sarah Duffy, for unflagging efforts in getting the editing right.

We also thank all of the software publishers and Web site developers who gave us permission to use images from their products in this volume.

Finally, and most important, we would like to thank our families and friends for their support of this 2-year project. Many thanks to Jack Thompson, Elizabeth’s husband, whose patience and endurance sustained her work, and to the vibrant online community Webheads in Action, whose spirit of comradeship, experimentation, humor, and inventiveness led the way in creating new cutting-edge CALL adventures. Thanks are due to Cary Anderson, Levi McNeil, and Leslie Huff for helping Joy keep life in perspective during this long haul. Also, thanks to Keun Huh, who provided support in the early stages of this project.
